

Department of War Manufacturing Technology Enterprise Joint Defense Manufacturing Technology Panel

More Details at www.DoDManTech.mil

Congressional Authorities

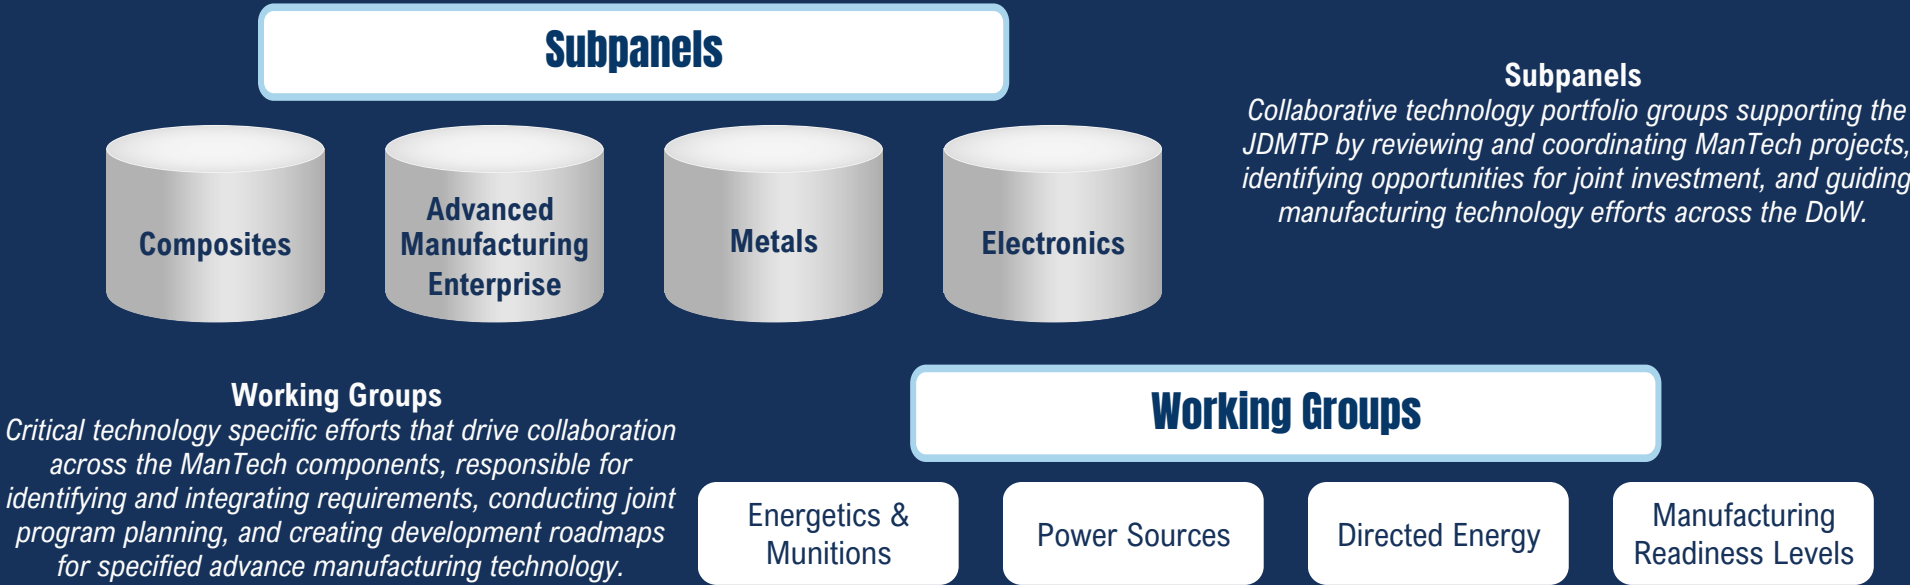

Authorized by **10 U.S. Code § 4841**, the Department of War Manufacturing Technology Program (DoW ManTech) delivers advanced manufacturing technologies to enhance the Warfighter's advantage. In the face of increasing global competition, DoW ManTech supports the rapid commercialization and fielding of innovative technologies by fostering advanced manufacturing capabilities and a strong, resilient industrial base.

Authorized by **10 U.S. Code § 4842**, the Joint Defense Manufacturing Technology Panel (JDMTP) serves to ensure coordination and collaboration across the DoW ManTech Program, by identifying and integrating joint requirements, conduct joint program planning and developing joint strategies.

Joint Defense Manufacturing Technology Panel Execution

The Joint Defense Manufacturing Technology Panel ensures coordination and collaboration across the DoW ManTech Enterprise through subpanels and working groups composed of ManTech Components and industry members. These groups review projects and identify investment opportunities in support of the DoW ManTech mission.

Department of War Manufacturing Innovation Institutes

The Manufacturing Innovation Institutes aim to boost U.S. manufacturing and military strength by fostering public-private partnerships. They achieve this through three main avenues: advancing research and development for innovation and military modernization, revitalizing the defense industrial base to improve national competitiveness, and promoting education and workforce development to prepare Americans for future jobs.
